SHADE AND ORNAMENTAL TREES

CHINESE ELM—More Chinese Elm are being planted in Colorado than all other variety of forest trees combined. They have proven superior for planting in dry locations and grow rapidly even in poor soil. Our advice is not to water after August 15th. If trees are in the lawn, sprinkle surface lightly and keep grass green. Chinese Elms will survive in dry locations where other trees will fail.

Prices are for straight, stalky, well-trimmed trees.

FOREST TREE SEEDLINGS

CHINESE ELM—We believe this to be the best tree for all around planting in Colorado. It grows rapidly, withstands drought, free of insects and is very hardy. Plant six feet apart for a windbreak and if wanted for a low trimmed hedge plant one foot apart and trim back well. Prices quoted are for heavy, stalky seedlings, fresh dug and are sure to grow. Have your neighbor order with you and save money. Note these new low prices on seedlings grown from hardy, acclimated trees:
